# Thermal Insulation For Use In Roofs, Walls & Floors

## KEY FEATURES

- ✔ SuperFOIL ReflectaFOAM is a semi-rigid product that combines a vapour control layer, acoustic membrane, thermal insulation, and radiant barrier in one.
- ✔ Made from up to 99% pure aluminium outer layer, the product is highly reflective and reduces heat loss in winter and blocks solar heat gain in summer.
- ✔ The high performance foil insulation utilises low emissivity air gaps to maximise the thermal performance.
- ✔ The built-in vapour control layer and thermal foam layer prevent moisture penetration, improve airtightness, and enhance u-values.
- ✔ ReflectaFOAM also reduces impact noise levels by up to 24 dB.
- ✔ It is perfect for insulating under rafters, ceilings, timber frames, solid walls, suspended floors, and with underfloor heating.
- ✔ It requires no specialist tools and causes minimal wastage, making it an ideal DIY solution.
